Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

Applicant is requested to update the status of the 09/378976 application in the first paragraph of the specification.

Specification

The disclosure is objected to because of the following informalities: It is the Examiner's position that Applicant has evoked sixth paragraph, means-plus-function language to define Applicant's invention. Therefore the Examiner requires the Applicant to amend the specification pursuant to 37 CFR 1.75(d) and MPEP 608.01(o) to explicitly state, with reference to the terms and phrases of the claim element, what structure, materials, and acts perform the function recited in the claim element. Please note that the MPEP clearly states, "Even if the disclosure implicitly sets forth the structure, materials, or acts corresponding to the means-(or step-) plus-function claim element in compliance with 35 U.S.C. 112, first and second paragraphs, the PTO may still require the applicant to amend the specification pursuant to 37 CFR 1.75(d) and MPEP 608.01(o)...". (Also see **MPEP 2181** (Rev. 1; Feb.2000)) *Wolfensperger*, 302 F.2d at 955, 133 USPQ at 542. Appropriate correction is required.

Appropriate correction is required.

Claim Objections

Claims 33-34, 47-48 are objected to because of the following informalities: It is the Examiner's position that Applicant has evoked sixth paragraph, means-plus-function language to define Applicant's invention. Therefore the Examiner has objected to the claims for the reasons set forth above in the objection to the specification.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

7The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 30-36,38, 46,47-50,52, are rejected under 35 U.S.C. 102(b) as being anticipated by Ishikawa et al. (U.S. Patent No. 5,147,319).

Ishikawa et al. disclose a shielded intravenous infusion assembly comprising an elongated needle (2) with a bevel distal end , a length tubing (11) , an elongated housing (3) , a pair of wings (5a, 5b) and a shield(6) pivotally secured to the housing by arms/mounting means (4a,4b) for pivotal movement from an open to closed position. See figures. 2-4, 6. With respect to the flexibility and rigidity of the wings Ishikawa et al. disclose the wing (5 a and 5b to be flexible and the arms of the wing (12) to be rigid. Further, all elements have a relative degree of flexibility and rigidity. The clip is further considered as (9, 10a, 10b).

With respect to claim 49, figure 2 or 4 shows the relative position that is claimed when the shield is enclosing the needle.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 37 and 51 are rejected under 35 U.S.C. 103 as being unpatentable over Ishikawa et al. (U.S. Patent No. 5,147,319) in view of Whitehouse et al.(U.S. Patent No. 4,743,265).

Ishikawa et al. disclose the invention substantially as claimed. See above.

Ishikawa et al. disclose single hinge. However, Ishikawa et al. does not disclose a double hinge. Whitehouse et al. teach single and double hinge for connection interchangeably. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the single hinge to a double hinge as a design choice lacking any criticality or structural distinguishing features.

Allowable Subject Matter

Claims 39-45,53-58 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to LoAn H. Thanh whose telephone number is (703) 305-0038. The examiner can normally be reached on Monday to alternating Fridays (7:00 am-4:30 pm).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian Casler can be reached on (703) 308-3552. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0858.
